

A successful run for Asia Energy at Downstream Asia 2011, Singapore

Lloyd's Register Asia participated as a Gold Sponsor at Downstream Asia 2011 – the largest refining and petrochemical event in Asia to highlight the downstream sector services we offer.

Held over three days, the event brought together all key players in the oil & gas and petrochemical refining industry to discuss important issues such as market trends, margin improvements, fuel regulations, transportation fuel, environmental concerns, latest cracking technologies, catalyst developments, and integration of petrochemical complexes..

As part of the sponsorship, Lloyd's Register played an active role in the events proceedings. Wijnand Moonen (Lloyd's Register's Area Manager and Energy Business Manager for South East Asia) presented a paper on 'Flexibility in running production assets, the new paradigm?' and Agusetiyo Triabadi (Energy Downstream Sector Leader), presented a technical paper on 'The RBMI Integrity Operating Windows (IOW's) best practice'. Alongside this, using the concept of a board game, the energy team - led by Andrew Blue, conducted the post conference workshop on the AIM Game, an asset integrity management exercise illustrating the vital importance of managing asset integrity..

Throughout the event the energy team engaged in extremely valuable on site client meetings and networking sessions, in particular with her Royal Highness of Brunei, Princess Fadzilah Lubabil Bolkihah alongside her legal advisor and the Minister.
