

## First contract win for Technical Consultancy for Wind Turbine Installation Vessel with Dalian Shipbuilding Industry Co. Ltd.

The Energy team in China signed a consultancy contract with Dalian Shipbuilding Industry Co. Ltd. (DSIC) for the provision of specialist structural analytical services working during the design stage of their first Wind Turbine Installation Vessel (WTIV). The specialist vessel is destined for operation offshore Jiangsu province, China and is specifically design to operate in shallow tidal waters. The win of this contract is not only significant being a first for Lloyd's Register but also in how it was won as a group team effort; cross stream (Energy and Marine), cross business entity (Energy and LR Scandpower) and cross regional (China and London).
