

Success with Formosa Plastics

Months of close collaboration and complex negotiations with Formosa Plastics involving efforts of a host of Energy Asia team members finally culminated in the Energy Asia Team tabling a winning proposal which resulted in Formosa Plastics awarding contract to Lloyd's Register. Lloyd's Register in Taiwan has been engaging long with Formosa Plastics for undertaking failure investigation at the Mailiao complex when, in July 2011, due to fire breakout at the plants, the Taiwanese Government told Formosa to shut down plants, conduct independent investigations and review the process safety system using an international 3rd party.
